Excerpt: . . . effect at the time of acquisition. Beginning in fiscal year 1998, however, components - other than working capital fund activities - are required DOD to apply a single 100, 000 capitalization threshold to assets, irrespective of the threshold that existed at the time of purchase. Under this policy, all general PP and E assets, previously capitalized by non-working capital fund activities at thresholds less than 100, 000, will be expensed in fiscal year 1998. Recognizing the effect this policy would have on operations, working capital fund activities are required to apply the capitalization threshold only to newly acquired assets, beginning in fiscal year 1998, and to retain, on their financial records, existing capitalized assets even though the assets may have been capitalized at a level of less than 100, 000. Prior audit reports have disclosed that higher capitalization thresholds have not been uniformly applied throughout, resulting in DOD inconsistencies in asset reporting and the omission of billions of dollars in DOD assets from financial reports. As a result of the higher capitalization threshold, billions of dollars of assets have been expensed - effectively removing them from accounting control. For example, Navy auditors estimate that if the 100, 000 capitalization threshold were applied to the Navys March 1996 nonmilitary equipment balance of 6 billion, over 1 billion would be eliminated. In a letter to DOD in March 1997, we estimated that at least 5 billion of the Armys equipment would have been excluded from the Armys fiscal year 1996 financial statements if the 100, 000 threshold was retroactively applied. Eliminating these items from financial control and the accountability imposed by annual audits...
